- Push notifications

Recommended tech stack

Simple web app (PWA)

- Frontend: React + Vite
- UI: Tailwind CSS + shadcn/ui (or Material-UI)
- Backend: Node.js + Express
- Database: PostgreSQL (or SQLite for simplicity)
- Auth: JWT tokens
- File storage: Local filesystem (move to cloud later)
- Deployment: Vercel/Netlify (frontend) + Railway/Render (backend)

Questions

1. Platform preference?
 - web with PWA
2. Photo storage preference?

- cloudinary
